Title:

Comments: In 1979 our Air Force family arrived, as directed, to the Black Hills. of South Dakota.

We had many years of community activity and the Black Hills National Forest was [?] foremost in scouting, Sierra etc ability [?]

Our Air Base is rapidly expanding to be the new home for a bomber. Many folks are coming to service the United States of America.

These folks are expecting and requiring a healthy environment.

Our water sources has never been considered plentiful. Hydro studies have revealed easy chemical / toxin contamination.

Please protect our willing military from harm. Please approve our request for a 20 year mineral withdrawal.

Many Thanks,
