Title:

Comments: Stop this massive burning project for the Sequoia and Sierra National Forests in California that covers 2.4 million acres-including all 866,741 acres of designated Wilderness on both national forests, and just let Mother Nature do her stuff! The capitalists "RAPE" of Her verdurous paradise has got to end. These anthropocentric terraforming attempts are being done without the multivariable understanding intricate cause & effect connections of everything to everything else!
