Comments: Dear US Forest Service,

I hope you all and your loved ones are safe and healthy with everything you need, in strength, endurance and resources.

The Pactola-Rapid Creek Watershed is an interdependent ecology sustaining the safety and health of sacred Water and all life beings not only within it but downstream. Just as I pray for your health and safety, I pray that the Pactola-Rapid Creek Watershed and all beings in the watershed and downstream be safe and healthy now and for the generations to come, in strength, endurance and resources.

We humans have been given a voice to speak for the sacred Watershed's protection. I write in deep witness and honor and gratitude to Her millennial fulfillment of Her responsibility as a life-giving force. May She continue her offer of clean water in strength, endurance and resources, which includes the Pactola Reservoir-Rapid Creek Watershed Withdrawal.

I support the Pactola Reservoir-Rapid Creek Watershed Withdrawal.

The USFS should require mining companies to withdraw from this pristine and sensitive area. And further, expedite the Withdrawal proposal to the Secretary of the Department of Interior. This is our responsibility as humans who protect and keep safe and healthy clean water in the Watershed in alignment with the greater good.

Thank you for receiving and hearing my comment and please stay safe and healthy.
