Title:

Comments: Please consider sparing designated wilderness from the planned intensive burning and cutting outlined in project #65081. I am supporting Alternative C, Wilderness Exclusion Alternative and would like the Moses Mountain Recommended Wilderness to be added to Alternative C.

These areas need judicious protection and the scope of this project is far too extensive and invasive and not in line with the 1964 Wilderness Act. Think of the definition of wilderness according to Howard Zahniser, author of the bill, "A wilderness, in contrast with these areas where man and his own works dominate the landscape, is hereby recognized as an area where the earth and its community of life are untrammelled by man, where man himself is a visitor who does not remain."

It's very clear that the aggressive project, potentially using drones and helicopters, ignores the intention of the Wilderness Act. Allowing natural means of lightening caused fire to modulate the ecology is congruent to the theory of wilderness. Thank you
