Title: 400 FACTs Business Sub Group

Comments: Review of DOF, FACTS 4000 Series Business, FSM 2470 as documents before the business rules and manual are finalized. With reviews and updates at the WO level so lengthy we want to get it right the first time. Given the potential overlap between the 4000 series business rules and the Manual it would be prudent to review both for consistency before the manual is finalized. This could be done concurrently with the response to comments. The link between the SAF DOF is another decision point that should be made deliberately (do FSM/4000 BR line up with DOF or allowed to deviate.) Examples include but are not limited to: 1) a. Precommercial thin to [non]-commercial thin (4000 series vs manual); 2) 10% vs 20% residual stocking for even-aged and two-aged treatments/stands (DOF vs Manual/4000 series)

C1: Suggested inclusion to the manual of 4570 (other stand tending) with the activity codes that trigger FOR-VEG-IMP- (Both Measures) reporting?

C2: In the manual the reporting measures are listed for FOR-VEG-IMP and not for FOR-VEG-EST. Was this an intentional decision?
