Title:

Comments: Forest vegetation is used throughout the document, and I think there might be a benefit to include a definition of "Forest vegetation", or to describe "forest vegetation" under the "forest" definition. In 36 CFR 219 Forest Land is defined as "Land at least 10 percent occupied by forest trees of any size or formerly having had such tree cover and not currently developed for non-forest uses" - Forest land in this document uses the word "occupied" instead of the word "stocked".

Under 4. - remove comma after "Base detailed prescriptions"

Here - "forest vegetation setting" is used- could it be better to use forest land or incorporate a a definition of forest vegetation setting?
