Comments: The attachments should accompany the comment letter NMFS submitted on November 21, 2024. The wildfire chapter (Capelli 2024) provides a discussion of the broader context of NMFS' recovery strategy for southern California steelhead. The recently published study by Barfuss et al. (2024) further documents the potential role of the non-anadromous form of O. mykiss in the recovery of the anadromous form.
