Comments: My comment would be since BNF is looking at trail maintenance and improvement that all trails and roads affected by the Lava fire be rehabilitated. Also, there are some trails on the MVUM that are obstructed due to logging. One such trail is trail 204 that connects to FS404G. Since there is an effort to maintain and improve I would like to suggest that trail 204 be rehabilitated to its former self and to connect, unobstructed to FS404G.

Thanks.
