Comments: First, thank you for your service.

Please see attached objection period comment. I submit this under the provision of new element or issue, here specifically the lack of any update in the Jan 2025 Drafts for the battery alternative. I discuss that many trends not considered in the Jan 2025 Drafts could make a battery alternative better, both for the VOC-McGuireville link and longer run strategically, and that more detailed and authoritative analysis is needed to determine that.
