Comments: I urge the Forest Service to maintain existing protections for mature and old-growth forests and to prioritize their conservation. I went hiking in Oregon last year with a friend who lives there, and I was in awe of its beautiful forests. I visited some locations like the Sahalie and Koosah Falls and Salmon River Trail, and I felt so at peace among the many tall trees and diverse wildlife. I believe that forest and wildlife preservation is important, and I want others to be able to experience the awe and connection to nature that I felt. Please do not weaken protections for these irreplaceable ecosystems.
