Comments: public comment on federal registeri do not support this logging thinning project which is an assault on public land owned by 335,000,000americans who mostly support protecting our national land for nature and the value of nature in preservingour lives and the necessity of having trees standing to produce oxygen, prevent flooding, provide shade, anduse up carbon, as well as the value by rivers to fish populations and homes for birds, wildlife. this loggingproject is about greed, selfishness, govt corruption in havin far too close relations wiht profiteers andforgetting they have any obligation at all to the entire citizenry of the united states. this is not idaho land. thisis federal land. it all this road consturciotn is in fact a tax increase to all of us. we have to pay for those roadsto be laid down and for reconstruction and that in itself is an assault on the forest health. trees have roots thatntertwine and cutting them down creatuers loss of neighbors/trees. they spport each other so the effect sof thisstupid thinning hurts so many more trees than the ones the moneymaking touch.stop this assault on the citizens land now please. the gov must respond to the people. we are sick of beingmauled by a corrupt govt that only makes deals with rich corporations and individuals to destroy. jean publeejeanpublic1gmail.com
