Comments: SHARP is exactly what Mammoth needs! We have very few trail options in the Sherwins and limited mountain bike trails outside of those on Mammoth Mountain. Further development will improve our access to recreational opportunities close to town while dispersing people to avoid overcrowding in outdoor spaces, which can be problematic at times. This plan also includes measures to rehabilitate unofficial trails in the Sherwins and add appropriate signage so that people stay on trail. It would be a disgrace to not expand and restore trails through SHARP. This plan will ultimately lead to better preservation - we all know that trails keep people on trails! The immediate community, the many who travel here to enjoy the outdoor wonders of Mammoth , and the wildlife will hugely benefit.
