Comments: I would urge the planning process to including alternatives to the decommissioning of the Gordon Pond Trail. It is a lengthy trail which passes waterfalls. The current problem is the issue of access. There's no discussion in the draft EIS of whether there are alternatives which could address the access problems. For instance, (a) Reservoir Road intersects with the trail in both US land and Town of Woodstock land, (b) a driveway to Woodstock private parcel 206-041 passes through US land close to the trail, and (c) there are small private lots along Lost River such as parcel 206-003 and 206-001 which could perhaps be acquired (and which would allow access sites along to Lost River). Perhaps one of these options could provide dedicated seasonal parking.
