Comments: I attended the meeting in Craig, Alaska April 30, 2025.

I'm the guy who asked about us in the public getting access to the same GIS databases you're using internally and with 'partners'.

The main platform you at USFS use internally is ARCGIS, and series of layers opened in Region 6 is available here https://www.arcgis.com/home/item.html?id=0659de40d8ad44879bf213ecf4cc9c5a .

On the ARCGIS page (see attached screenshot) I do indeed see a connection with Avenza maps which you suggested for us to use last night.

My goal is to engage with you and your peers and have more access to us for Region 10. Whether a direct connection to the web interface at arcgis.com, and or API connection between you and the Avenza maps platform.

Thank you!
