Comments: Additional consideration should be made to account for the impacts caused by the snowmobile trail elimination. The elimination of the snowmobile trail around Chair 1 will have a major impact on snowmobiling under certain circumstances. The elimination of this route causes a reliance on using town trail for most riders/tours to be able to access the trails out of town. This trail is unreliable with early/late season conditions and impacts from misuse (driving/parking vehicles on the trail). If the trail is not in good shape, riders will have to take other measures such as trailering for which there are inadequate provisions causing trailer parking in prohibited areas (e.g. resort parking lots, Rattlesnake trail head, and Cedar Breaks North View parking lot).

It is recommended that additional provisions be provided for ride origination and parking on both ends of town.
