Comments: Firstly, I want to start off by saying thank you to all of the employees of the forest service, your hard work doesn't go unnoticed. I greatly appreciate all of the efforts that go into the care and management of our public lands. As someone who takes great pride and nature, both here and all across are a great nation, submitting a comment is the least that I could do.
In regards to this specific posting, having reviewed most of the documents available, my only concern is we take great care not to utilize chemicals and products that could contaminate, even if that means that the non-native plants must be dealt with another way. It is imperative that we take great care of what we have for not only today, also for future generations to enjoy and a way of preserving our past history.
