Last name: Craveiro De Sa

Organization: Colorado Parks and Wildlife

Title: SE Region Senior Resource Management Supervisor

Comments: Hello,

Attached are the CPW comments for the Cimarron and Comanche National Grasslands (CCNG) Revised Land Management Plan and Species of Conservation Concern (SCC) Draft List. Attachments include our summary comment letter as well as a SCC/SGCN Comparative Analysis Spreadsheet.

Species CPW recommends for inclusion in the SCC Draft List are based on SWAP 2025 species recommendations and review of best available science datasets. If a species was not identified by the USFS as meeting the four SCC identification criteria, but was listed as a SGCN based on CPW 2025 review, a CPW subject matter expert was consulted. That CPW staff member evaluated population status, trend, abundance, and distribution data, where available; historical and contemporary survey data, monitoring records, field observations, agency and partner databases, and published literature. These data were used to evaluate the species against the SCC identification criteria. Additionally, several subject matter experts have met with USFS to discuss their findings and provide supplemental datasets regarding these recommendations.

Details of the review are also listed by species in Column "O" of the SCC/SGCN Comparative Analysis Spreadsheet. A description of spreadsheet content is included within the CPW comment letter.

We appreciate the opportunity to review the documents and engage with USFS as a Cooperating Agency. If you have any questions or would like to follow up, please feel free to contact me and we would be happy to discuss further.

Carolyn Craveiro de S[acute]

SE Region Senior Resource Management Supervisor
