Comments: I live and recreate in the woodlands in Shannon, Texas, Dent, Oregon and Carter counties. The woodlands these counties that are a part of Mark Twain National Forest along with other entities are very important to me for my physical and mental health. One gains many advantages from their time in the woods that you cannot gain through doctors and counseling appointments. Nature is the best medicine of all!

This proposal is such an important step to protect the Ozark Trail. I am glad formal corridor protections are being added!

The 100-foot buffer is exactly what the trail needs to stay in good condition for hikers, bikers, and equestrians.

Thank you for taking steps to help maintain and protect the Ozark Trail. This is great news!

I support this amendment and the protections it provides for the Ozark Trail corridor.

It's so important that the Ozark Trail has a no-harvest buffer. This will help preserve the trail for future generations. These protections will help safeguard the condition of the trail, making it more sustainable and easier to maintain for years to come.

Thank you for adding protections to our public lands!
