Comments: I want to go on official record that I oppose the proposed 300 acre mining in the Garland and Saline County forest. We love our natural state!!! I sell real estate in the area and many people move here to retire and raise families away from the cities and industries. They come for the natural beauty we offer and the clean water we are fortunate to have....we do not want to risk our hot springs, our cold springs and our water shed. The Animal habitat needs to be protected as well. Please I beg of you to keep protecting our lands and resist the pressure of big business and outside interests that want to rape and pilage our state and our lands.
