Last name: de Jong

Organization:

Title:

Comments: Please accept the attached objection from Karl de Jong regarding the 2025 Mt. Baker Geothermal Consent to Lease, Project #284163.

I submitted timely written comments during the public comment period. This objection is limited to issues raised in my prior comments and supported by the Final Environmental Assessment, draft Finding of No Significant Impact, response to comments, and supporting resource reports.

The objection requests targeted revisions to clarify the scope and effect of the consent-to-lease decision, preserve future site-specific review, clarify stipulation waiver/modification procedures, and strengthen future coordination before any ground-disturbing proposal is approved.

Thank you for your consideration.
