Comments: plan revisions

I'd like to express my concerns about the planned revisions for the Nez Perce and Clearwater National Forests. I live in the area and spend a lot of quality time in these forests.

Please allow for the functioning of age old, natural processes instead of focusing management on certain human generated outcomes. It is the majesty of nature that brings us and the environment into balance, not our little, busy human minds.

Please continue to protect all roadless areas including additions to Gospel Hump identified by the Friends of the Clearwater (<http://www.friendsoftheclearwater.org/gospel-hump-additons-2>).

I hope you will review and consider the citizens alternative proposal as presented by Friends of the Clearwater.

Sincerely,

Karen Young
