Comments: I do not understand this proposal to formulate an intelligent opinion. However I do want to express my strong opinion that there be a very clear understanding of where motorized vehicles are not allowed. I want to go places where they are absent. I understand wilderness is off limits to vehicles. But I can't backpack anymore. So I would like to know how to find those places that I can drive to and do day hikes, and camp in a campground with my car. Joyce gave me a very good introductory lesson on this. Thank you.
