First name: Thomas

Last name: Peterson

Organization:

Title:

Comments: This meeting was a total waste of public dollars. Nothing was said or presented. Maps do not equate to thoughtful management of our public lands. yes the USFS has high tech GIS. So what.

I did not come here to speak or ask questions.

Maps containing acronyms without definitions for the ignorant are meaningless. There was no one to ask in any case. There was only one unifored or otherwise identifiable USFS employee in the building. Not even name tags.
