Comments: forest plan comment

This is not a forest plan this is an industrialization plan.

There is no good science or justification behind the proposal to exempt the C/NPF from the National Forest Management Act,

For decades the national forests in America have been bound by a 40-acre clearcut size maximum.

When Brazell's proposed forest plan is finalized it will, 1) exempt the Clearwater/Nez Perce National Forests from the USFS 40-acre clearcut size limit, 2) hardwire 1,500-acre clearcuts into the plan, and 3) allow clearcuts of any size when he declares a "catastrophic" event has occurred.

Brazell and his plan are catastrophic events.
