Subject: WWW Mail: Protection of the Great Burn

Please know this is a voice to protect the whole of the Bitterroot divide in the Great Burn area, so that it can remain

WILD and a much needed wildlife corridor for the health of our wild ecosystems. It is incomprehensible to me that the LIFE of these animals is being threatened by recreational interests of our own species. I am well aware of how motorized vehicles have violated the non-motorized zones in the Selkirks, showing a lack of consideration for wildlife by breaking the rules. Somehow, I do not feel giving motorized vehicles more pristine forest space to play is a proper response to those violations. Yes, areas can be provided for motorized vehicles, but invading the wilds is not an appropriate response, in my view. Thanks for listening. Sandra Lilligren 1135 University
