Comments: "The Magdalena Mountains

My family has ranched here since 1882 Whats happened to these mountains is all the deer are gone about all the cows have been taken off & the Forest Service will not (illegible)

The deer are trash eaters. Brush trees weeds No grass. The cows eat brush and grass.

(Illegible) as few of these animals are left the mountain has grown up so thick with this trash you can hardly ride a horse anymore.

So many worthless trees, they suck all the rainfall there for most of the springs have dried up- what needs to happen is to let it burn
