First name: Edward

Last name: Mann

Organization:

Title:

Comments: I want my resources on my public lands managed to 21st century science standards and knowledge, as opposed to the 1890's Organic Act. I want more intensive silviculture practiced on my lands. More attention needs to be paid to stand structure, forest structure, and age class distribution across the landscape. I am a certified silviculturist.

(entered into CARA system, by Debbie Kelly, plan revision staff- per hand written comment for submitted by Mr. Mann at a public listening session. Original to be filed with project record.)
