Title:
Comments: 1. With the forest service keeping Valley County poor by not logging - we

need industry, and in this case a mine can help make up the difference.

2. The United States needs Antimony - most of which in this world comes

from China. Currently only 1% of the world's Antimony comes from the

United States. We need our own supply.

3. The Idaho Conservation League and Sierra Club and so on will be against

ANY mine, no matter how good it is. Their mission is to OBSTRUCT,

OBSTRUCT, OBSTRUCT - and nothing else. So please take their opinion as

if it is a grain of salt.

4. There is nothing wrong with Midas Gold making a lot of money.

Dwight Jividen
