Comments: By starting at Landmark with a new road, Yellow Pine will suffer from the road being close from Yellow Pine to Thunder Mt.

My customers come in to take day trips to Big creek, Stibnite, Thunder Mt. see old buildings at Cinnabar and hike into Roosevelt Lake. Then back to Yellow Pine.

The underground water has arsenic in it. So the mining companies have hauled water from Yellow Pine for years. We moved here in 1984.

The road could go around the pit or across on the other side of the mine. There is so many problems Midas hasn't even thought of.
