Comments: I am writing to comment on the Foothills Landscape Project. I am an avid hiker in these northeast Georgia mountains and have an interest in seeing them taken care so that future generations may enjoy them as I have.

The thing that jumped out at me right away was the size of the area of the Project. I think it would be better to reduce the size of the area and note the specific areas targeted for treatment.

There appears to be a heavy use of herbicides throughout the entire project and an excessive amount of land set aside for timber harvest.

I am in favor of the road closings proposed.
