Comments: the forest service has come up with the same old war on forests and wildlife in this plan. log it to death.

thin it to death. new roads all throyg it to destroy it through human use. burn it up. chemically attack it.

how can wildlife or trees sustain and live from an attack by the forest servicelike that.

how do we stop this enemy of all nature? i am writing in my disgust at yet another devastation plan for

another forest owned by this nation of 328 milloin people who recognize the importance of presering

nature. it is our lives at stake here. actually it is. wwhen we poison and kill all nature, we kill ourselves. we

m ust stop this vile, deplorable, evil, wicked agency and do it now. their plans suck. this comment is fot

the public record. please receipt. jean publiee
