Last name: Litten

Organization:

Title:

Comments: What say you to the following:

"...the proposal gives the Forest Service free rein to implement potentially detrimental actions for decades to come. The worst aspect of the Foothills Landscape Project proposal is that it would strip the public's input on management decisions. As part of the project, the Forest Service will not make decisions about where logging, burning, and road building will occur until public participation opportunities guaranteed by law have passed."

Michael "The Lorax" Litten
