Comments: I just found out today about Project #52509 and I am highly bothered by it. Myself and my fiance are always in the woods looking for what are considered "special trees." We are searching for Trail Trees that were bent by Native Americans to mark trails, gravesites, water, camps, etc. If the forests are to be logged off or burned, all of the history will be lost forever. We are members of the Mountain Stewards Organization and we have found nearly 100 Trail Trees and we also found 3 Healing Trees in northeast Georgia. This Project needs to be banned as it would stop future generations from knowing about the history of this area and the people who have lived here. I definitely say "NO" to Project #52509!!!!
