Subject: Oil and Gas Drilling - Texas National Forest

Attachments: East TX RFD Report Comment - Ryan Rios.pdf

Rob,

Attached is my comment card in regards to the National Forest and Grasslands in Texas Oil and Gas Leasing Availability Analysis EIS. Would you please respond or have someone that knows the answer to my comment/question please respond?

Also are the comment cards going to read allowed at the meeting tomorrow. I am located in Central Texas and will not be able to attend.

Thanks for your time,

--

Ryan Rios

Attachment text:

Hello, my name is Ryan Rios. I am an avid hunter and outdoorsman that enjoys the National Forests and all that they have to offer. After reading the RFD I noticed not once was an environmental impact study referenced; what is the scope of impact on the surrounding wildlife at potential well sites? My question is has the National Forest even consulted or requested a wildlife impact study with State or Federal biologist? The whole RFD report is about potential development and does not address environmental/wildlife impact between 2018-2037. Please respond to my comment.
