Subject: Comment on NFGT Oil and Gas Leasing

Attachments: fseprd664757.pdf

See comment also attached:

I oppose allowing our precious public forests and grasslands to be exploited and ravaged by a failing, profit seeking industry that must be stopped, or at least limited, if we are going to save humanity from climate catastrophe. The Forest Service must weigh not just the impact on our forests and grasslands that provide so much health benefit to the people, but also the additional greenhouse gases that will be produced during the extraction of these fossil fuels, the gases produced in the use of these fossil fuels, and the loss of crucial carbon absorption capacity of the forest and grasses removed and disrupted.
