Title:
Comments: For almost 100 years this Stibnite area has been a sore spot to the likes of those in IDAHO. Especially those of the First Nation.

Yet here is a company, actually the first who has brought forth a Solution. Not a Government bailout but a company and investor supported way to move that which and currently is offering no benefits to the surround community and state, to a direction of correcting wrongs from the past. Your YES vote is the only solution for a sustainable future for the area of IDAHO.
