Comments: Midas Gold Idaho's Stibnite Gold Project presents Idaho, particularly rural Idaho, with a huge economic and environmental opportunity. I am writing to encourage you to permit the project as quickly as possible.

If the Stibnite Gold Project moves forward, it will be the only antimony mine in the America. This important mineral is used as a metal strengthener and fire retardant. It is used in everything from batteries, textiles, cell phones, plastics and cable sheathing. Right now, we important all of our antimony. With all that is currently going on in the world, it is more important than ever that we not rely solely on foreign countries for minerals of such great importance. It is estimated that the Stibnite Gold Project could provide approximately one-quarter of American demand for antimony.

The Stibnite Gold Project is the type of project our state needs. I highly encourage the U.S. Forest Service to permit this project, using alternative two presented by Midas Gold, as expeditiously as possible. There is no need to extend the comment period. Sixty days is plenty of time to comment and we need the benefits of this project now.
