Comments: The trail / old logging road highlighted in the attached file is used by Snowmobiles, trail runners, mountain bikers and horse riders. It receives relatively little motorized usage (i ride the trail weekly once it dries out in the early summer thru the fall)

The North end of the trail is impassable to 4 wheeled vehicles. the road is mostly flat and not contributing runoff, it drains to Fish Lake. It would be ideal if the Southern End is closed to limit access by vehicles and let the road continue to devolve into a trail. Current 4 wheeled usage is primarily in the spring when trucks look for mud, which negatively impacts other users.
