Comments: It would be horrible to keep destroying wooded areas of beauty. It has to stop! The trees help clean the air and provide beauty of scenery for people to enjoy. People travel distances to see what beauty we have left in this country and to help get rid of some of the stress that is upon us on a daily basis. It's gives us peace, at least for a short time. Please quit taking it away. We are told to plant trees, not kill them. See a couple of my views to see the beauty we don't want to destroy.
