Comments: To Whom It May Concern, I would like to go on record as being opposed to this proposed project. Holland Lake is not the correct venue for a project of this magnitude. For one thing it is a small lake that is overwhelmed by the craft that is already using it. In addition, for the past several years, a pair of loons has had an active nest on the lake. This year they produced one chick that was alive and well when I was there in early August. I believe that a large influx of people and lake traffic will force them to abandon the lake. I urge you to say "No" to this proposal. Thank you for your time. Debra Reeves

P.S. I have attached two photos of the loons. The first is when nesting was taking place in June, the second in early August. The other parent was present but not close enough to include in the photo.
