First name: Ana

Last name: Dronkert Egnew

Organization:

Title:

Comments: The attached comments were prepared as part of a comprehensive review by an array of resource specialists on the Stibnite Gold Project. Those comments were submitted in full by ICL, Save the South Fork et al. We are also submitting our review and comments on the Wildlife analysis separately to underscore our concerns. We are wildlife biologists (retired) who have worked for more than 20 years in central Idaho and the Payette National Forest. We respectively share our expertise with the wildlife resources of the area and concerns with the impacts of the Stibnite Gold Project on those resources.
