Title:

Comments: To whom it may concern: I am concerned about the proposed logging project in the Pole Creek area. I ski the area in the winter and hike and recreate there in the summer. I enjoy seeing wildlife and know that part of the area is important roadless and security habitat for ungulate species. Please consider all of the impacts thoroughly, and I ask you to consider a range of alternatives that include smaller projects and not logging the entire area proposed. I also ask you to consult with the Powder River Pass Nordic Club to minimize impacts on winter recreation. Thank you, Shannon Anderson
