Title:
Comments: Hello,

[middot] I have spent a great deal of time hiking in the area that is currrently under consideration for exploratory mining.

[middot]

[middot] I am wondering why an EIS isn't required.for this project, which would certainly seem appropriate.

[middot]

[middot] Basically I think it would be a shame (borderline criminal) to destroy this beautiful area of the Black Hills. And where would it end?

In short, I am adamantly opposed to permitting exploratory drilling in Hell Canyon and surrounding lands.

Donna Watson
