Comments: Hello. I am writing to say I am deeply opposed to F3 Gold's Newark exploration. This area is one of the most beautiful parts of the Black Hills and it would be devastating to ruin it with gold explorations. This has no place in our precious Black Hills. I often go to Custer State Park and cannot imagine that you would even consider to endanger this place, let alone water supplies in that area and in the city of Custer! Please do an Environmental Impact study before approving anything.

And would like to add that my sons and grandson are Lakota and you must respect their Treaty rights. Not to do so is a slap in their face and could prove a disaster to my grandson's future enjoyment of the Hills that his ancestors have lived in for hundreds and hundreds of years.

Thank you

Cindy Lloyd
