

FROM THE COVER

TECH

From page A1

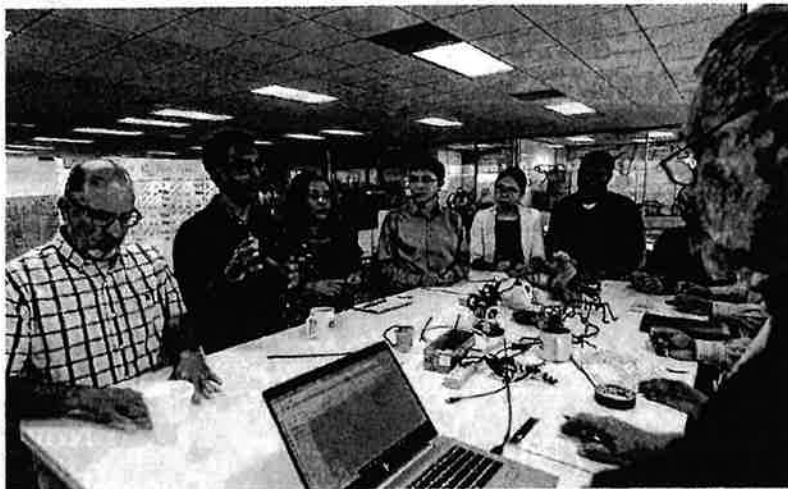

228,000 tech jobs in the region are outside of traditional technology companies such as Google, Amazon and Dell.

"There's a misnomer that energy companies and pipeline companies are not technology companies," said Al Monaco, CEO of the pipeline company Enbridge. "Nothing could be further from the truth. In fact, industrial applications like ours are a treasure trove of opportunity."

Enbridge, a Canadian pipeline company with a major presence in Houston, is tapping into tech talent to improve its operations and profits. Enbridge opened a technology and innovation lab at its Calgary headquarters in January and followed that with the opening of a second tech lab in Houston in April. The company plans to open a third in Edmonton, Alberta.

The company's Houston tech lab is part of a larger industry trend. The energy industry was initially slow to embrace digital technology, but companies have accelerated their efforts in recent years. Companies such as the European oil major Royal Dutch Shell, the international oil field services company Schlumberger and the French energy firm Engie have also opened tech labs in the Houston area.

Houston oil field services company Baker Hughes recently signed a deal to form a digital alliance with Silicon

Energy tech workers meet during a morning scrum at Enbridge's Houston tech lab. At the morning meetings, lab workers huddle to talk about what they are working on and offer advice on solving problems.

Valley artificial intelligence company C3.ai and tech giant Microsoft to boost the use of artificial intelligence in the industry.

Baker Hughes also is tapping into younger talent, adopting elements of tech culture at its Energy Innovation Center in Oklahoma City, where customers come with problems from the field and leave with tangible solutions. Similar to the reality TV show "Shark Tank," where entrepreneurs pitch their business ideas to a panel of investors, employees at the Baker Hughes innovation center pitch their marketable business ideas

to executives and their partners. They also participate in "Innovation sprints" to develop new products in weeks or months.

"There's strong recognition by our leadership that we need to evolve and change," said Taylor Shinn, a Baker Hughes executive overseeing the center.

Accenture, a global consulting firm, opened its Houston Innovation Hub in February 2017 to develop software and technology for its energy clients. Successful tech labs are those that create an environment in which people from different backgrounds can put their

Bhushan Ivaturi of Enbridge developed the lab at its Houston building.

heads together and develop ideas that change the way a company or the industry does business, said Brian Richards, the Accenture hub's managing director.

"It's not easy to take a data scientist, a designer and someone who's been on a rig for 30 years and put them in a room together to create the next Google Maps," Richards said. "But when you do it successfully, it can be extremely valuable."

'Super high' demand

Workforce development experts are keeping a close eye on the oil and natural gas industry's digital transformation. An estimated 234,000 people across Texas worked in the oil and natural gas industry in October, down about 240,000 a year earlier, according to the Texas Workforce Commission.

Statistics for the tech side of the industry are somewhat hazy because new job titles are being invented faster than government officials can classify them. The Computing Technology Industry Association, one of the IT industry's top trade associations, estimates that Greater Houston has nearly 228,000 tech workers, but that figure includes job titles ranging from software developers and aerospace engineers to security system installers and cable television repair technicians.

The Greater Houston Partnership, a regional business advocacy group, estimates that two-thirds of tech jobs in region are in industries such as energy, medicine or aerospace.

"Demand is super high for tech workers," said Josh Pherigo, the partnership's research manager. "All the oil and gas companies are digitizing. They're changing their business models. They all want to know how they can use data to enhance their bottom line."

Competition for talent

The oil and natural gas industry's digital transformation is taking place amid increased competition for top tech talent. At Enbridge, the company is drafting people from departments such as engineering, pipeline integrity, customer service and even human resources and giving them tech training.

Located on the seventh floor of Enbridge's building in Houston's posh Galleria district, the lab has the feel of a Silicon Valley startup. Floor-to-ceiling windows, rows of standing desks, colorful furniture, free snacks, caffeinated drinks, toys, touch-screen TVs, video-conference rooms, lounging areas and collaboration tables offer a sharp contrast to the cubicles elsewhere in the building.

Bhushan Ivaturi, the company's senior vice president and chief information officer, said that was by design. As part of a digital strategy that he developed for the company, Ivaturi said, he wanted the labs to provide an environment in which employees drafted from different departments could come together and solve real-world problems for the company and its customers.

Employees at the Calgary and Houston labs already have developed ways to get sensor data from pipelines faster and improve flows of crude oil and natural gas. They've also used mountains of data generated by operations to develop better

maintenance schedules and improve pipeline leak detection. And with the company branching out into new areas of business such as renewables, tech lab workers have developed ways to reposition wind turbine blades that maximize power generation.

"This is where ideas take flight and are brought to life," Ivaturi said. "It's not experimentation for the sake of it. It's about applied technology and applied innovation."

Patrick Lamasney left a midlevel management job with the travel site Expedia and moved from Seattle to become the senior scrum master at Enbridge's Houston tech lab in August. Borrowing a term for rugby players packed closely together, Lamasney leads morning meetings known as "scrums" where lab workers huddle to talk about what they are working on and offer advice on how to solve problems.

"The opportunity to get in on the ground floor of something like this is a very rare opportunity in software development," Lamasney said. "Usually, you get added to a project that already exists. There are very few greenfield software development projects going on, regardless of where you're at. This is a tremendous opportunity."

Big ideas

Companies such as Chevron and Shell, meanwhile, have invested millions of dollars into local workforce development and education programs to cultivate homegrown talent. They also are underwriting co-working spaces and startup incubators such as The Cannon near the Energy Corridor in the city's west side and Station Houston downtown.

Station Houston CEO Gabby Rowe was tapped in October to oversee the transformation of an old Sears building just south of downtown into a nearly 300,000-square-foot tech hub named The Ion. The renovated building will house multiple co-working spaces, incubators and workforce development programs under a single roof. Despite being overshadowed by Austin, she said, Houston is emerging as a tech center focused on business applications and solving big, complicated problems.

"This is not the city where you come to invent a new dating app," Rowe said. "There's plenty of other places you can go work on that. We do big stuff. We cure cancer. We develop the artificial heart. We put men on the moon."

OPEC+ to cut another 500K barrels a day

Reductions designed to keep price of crude above \$50, could lift Houston energy sector

By Jordan Blum
STAFF WRITER

OPEC and Russia agreed Friday to a stronger-than-expected deal to further scale back oil production and help offset an oncoming glut of new crude flowing from

Texas shale and other non-OPEC countries.

The surprisingly deeper cutbacks, led by Saudi Arabia, are designed to keep crude prices from plunging below \$50 per barrel and could help prop up a struggling Houston energy sector that

has shed jobs and cut costs all year. The U.S. benchmark for crude oil jumped to nearly \$60 a barrel Friday — its highest level since September missile attacks in Saudi Arabia — and settled at \$59.20 a barrel.

"It's also a good day for our friends in Oklahoma and Texas," said Saudi Arabia's new energy minister, Prince Abdulaziz bin Salman, after announcing the

pact.

On paper, the deal follows the broad strokes of the agreement outlined earlier week, basically deepening the production cuts to 1.7 million barrels a day from 1.2 million at least through March. But what sent oil prices leaping was a commitment by Saudi Arabia to hold production some 500,000 barrels a day below its quota of 10.4 million barrels a day

and similar commitments by previous quota violators such as Russia, Iraq and Nigeria to make additional cutbacks and comply with the agreement.

Ultimately, any long-term gains for oil prices will depend on the Organization of the Petroleum Exporting Countries and its allies, collectively known as OPEC+, following through with their promises.

OPEC+ continues on B7

Job totals jump by 266,000, smashing forecast

By Patricia Cohen
NEW YORK TIMES

The Labor Department reported Friday that 266,000 jobs were added in November. Analysts had expected a gain of about 180,000, according to MarketWatch. The unemployment rate was 3.5 percent, down from the previous month. Average hourly earnings rose 0.2 percent, with a year-over-year gain of 3.1 percent.

The return of tens of thousands of striking workers to their jobs at General Motors helped supercharge hiring totals last month. The reassuring jobs report offered a counterpoint to renewed anxieties about an escalating trade war and a weakening global economy.

"I think that this report is a real blockbuster," said Daniel Zhao, senior economist at the career site Glassdoor. "Payrolls smashed expectations."

Revisions added an additional 41,000 jobs to September and October's employment figures. And a broader measure of unemployment, which includes part-timers who would prefer full-time jobs and people who are too discouraged to look for work, inched down to 6.9 percent.

Average monthly payroll gains for the past three months reached 205,000, a hefty number for the fifth year of an economic expansion.

Stocks rose following the report, with the S&P 500 up by about 1 percent at noon.

The health of the manufacturing sector has been somewhat clouded by the 40-day GM strike this fall and disruption in the aerospace industry stemming from the crash of two Boeing airplanes. Friday's report showed a gain of 54,000 jobs in that sector,

TOYS R US RETURNS WITH MORE INTERACTIVE STORE

Photos by Pu Ying Huang / Contributor

Toys R Us, the beloved toy retailer that went out of business last year, has returned to Houston with a revamped store that aims to offer a more interactive shopping experience than its failed predecessors.

Customers at the new Toys R Us, which opens Saturday at the Galleria, will be greeted by corporate mascot Geoffrey and encouraged to take a selfie with the iconic giraffe. Children can climb a nearby treehouse overlooking a

Retailer gets a second life with new spot in the Galleria

bookshelves. Toward the back of the store is a theater that can host birthday parties and toy events, as well as an interactive "Magic Mirror" screen displaying a digital Geoffrey that mimics children's movements.

Kids are encouraged to play with toys throughout the store and can ask staff to

filled with claylike Kinetic Sand, a Nerf blaster target range and a Cra-Z-Art studio where kids can make slime. Social media photo opportunities abound with popular characters from "PAW Patrol," Nintendo's Super Mario and "Star Wars," including Stormtrooper Captain Phasma made entirely out of Legos.

"We spent a lot of time making sure this store was experiential from the moment you walk in," TRU Kids Chief Executive Richard Barry said. "TV commercials, packaging and signs can only

reversing last month's losses, but it did not signal a significant upturn.

"Manufacturing is still flat after you pull out the returning strike numbers," Zhao said. "It's still suffering from headwinds from the trade war, but at least it's not worsening."

The labor market's hearty performance offers President Donald Trump something he can brag about after he fielded criticism this week for fueling trade tensions with Argentina, Brazil, China and European allies. In Congress, Democrats laid out a plan that could result in an impeachment vote before the end of the year.

Many Americans, though, are more focused on expanding payrolls and fatter paychecks, and in that respect, Trump has delivered.

"It's the economy, stupid," Trump wrote on Twitter just before the report's release.

Academy notifies online customers of 'suspicious activity'

By Paul Takahashi
STAFF WRITER

Academy Sports + Outdoors on Friday said that it found "suspicious activity" on a small percentage of shoppers' online accounts and that it has notified and encouraged those customers to reset their passwords.

The Katy-based retailer did not disclose how many customers were impacted but said all of them were notified by email Friday morning to change their online account passwords. The company said it came across the suspicious activity during routine monitoring of its website and that it suspects that some-

one or some group obtained legitimate login information from a source outside the company and attempted to log in to customer accounts.

No financial data, such as saved credit and debit card information, had been compromised, Academy said.

"We take customer security

seriously," said Elise Hasbrook, an Academy spokeswoman. "Academy, acting out of an abundance of caution, is encouraging customers to reset their password on their accounts."

Customers who change their password should be confident about shopping online with

Academy, Hasbrook added.

Several major retailers, including Target, Macy's and Kay Jewelers, have been impacted by data breaches in recent years as hackers seek valuable customer and financial data.

BUSINESS

Stefan Wermuth / Bloomberg

"It's also a good day for our friends in Oklahoma and Texas," Saudi Arabia's new energy minister, Prince Abdulaziz bin Salman, center, said of the pact.

OPEC+
From page B1

es and working to balance oil supply and demand through the entirety of 2020, said Jamie Webster, senior director at Boston Consulting Group's Center for Energy Impact in Washington, who attended the OPEC meetings in Vienna.

"The proof will be in the pudding though with how many barrels they actually take off," Webster said.

OPEC+ is scaling back production again because of the ongoing U.S. shale boom — the United States has more than doubled its oil output since 2011 — and a wave of new oil coming online from non-OPEC nations such as Norway, Brazil, Canada and Guyana. The concern among OPEC+ members — and other producers as well — is the new supplies could send crude prices tumbling without intervention by the cartel.

Shale production is still growing, but at a much slower pace because of midling crude prices. Drilling activity and job counts have fallen through all of 2019. Houston oil field services firm Baker Hughes reported Friday that the U.S. rig count dipped below 800 active drilling rigs for the first time since March 2017 when the industry was beginning to recover from the last oil bust. The U.S. rig count has plunged by more than 25 percent in the last 12 months.

Saudi Arabia and OPEC helped trigger that last oil bust in late 2014 when they decided to increase production with the goal of killing the U.S. shale boom through a war of attrition. That plan eventually backfired as the shale sector survived the bust by becoming more cost efficient — despite more than 100 bankruptcy filings — while Saudi Arabia and other oil economies suffered from the

limited initial public offering for its massive state energy company, Saudi Aramco. On Thursday, Aramco announced it priced its available shares at \$25.6 billion, giving Aramco a total valuation of \$1.7 trillion, which is more than five times the market value of Exxon Mobil.

The energy minister's younger half brother, Crown Prince Mohammed bin Salman, desires an Aramco valuation of at least \$2 trillion, and Abdulaziz predicted Friday it will rise to that threshold within a few months.

The other key to the deal was getting the other top player in OPEC+, Russia, on board. Russia's production quota is falling only from 11.9 million barrels a day down to 11.2 million barrels, although Russia has been producing more than 11.2 million barrels a day of late. Russia had resisted scaling back its output any more, but a reduction of 70,000 barrels a day isn't considered a particularly big ask.

Iraq's and Nigeria's quotas dip only slightly, but because they've violated their quotas, their compliance could mean a combined output cut of 200,000 barrels a day. The new Saudi energy minister has preached the need for honest compliance, and it was unusual for the energy ministers of both Nigeria and Iraq to participate in Friday's news conference to emphasize their planned adherence.

"I restate Nigeria's commitment to OPEC," Energy Minister Timipre Sylva said. "Nigeria will fully comply." Iraq's adherence to its quota is more uncertain, given its leadership void following the recent resignation of its prime minister amid political unrest and protests.

"We have faced problems — I have to be frank and clear about that," said Iraq Energy Minister Tha-

JANEL (DARLA JANEL BEVERS) BLANSCE
1936-2019

Darla Janel Blanscet, 83, of Waco, TX went to be with her Lord on November 28, 2019. A graveside service will be 1:00 pm, Saturday, December 7, 2019 at Oakdale Cemetery in Daisetta, Texas.

Janel was born August 24, 1936 in Daisetta, TX in her Mimi's home to parents J.C. and Thelma Bevers. Janel graduated from Robert E. Lee high school in Baytown, TX in 1954 and from North Texas State University in 1957 with a degree in education. Janel spent her career as an English teacher in Baytown, Sheldon, and Channelview School Districts. She was a longtime member of Memorial Baptist Church in Channelview, TX and First Baptist Church of Woodway, TX.

Mrs. Blanscet was preceded in death by her parents, her husband of 43 years J.R. Blanscet, her granddaughter Heidi Kay Blanscet, and her

Garza, Jose Sr. Johnson, Mary

sister Betty Rice. She is survived by her brother, Jimmy Bevers and his wife Brenda, her daughter Gaye Decker and husband Daren, her sons Kyle Blanscet and wife Kelli, Chad Blanscet and wife Lori, and her 10 grandchildren. She loved her Lord, spending time with her family, serving in her church, and watching her beloved Aggies. In lieu of flowers, donations may be made in Janel's name to Samaritans Purse Operation Christmas Child at <https://www.samaritans-purse.org/memorial-page/janel-blanscet-waco-tx/>.

Mehos, Alexandra Ramirez, Carmen

ALEXANDRA CARAVAGELI MEHOS
1919-2019

Alexandra Caravageli Mehos was born on the 27th of November 1919, and passed away in Houston on Monday, the 2nd of December 2019, just five days after celebrating her 100th birthday.

Born in Galveston, to where her parents immigrated from Greece in the early 1900's, she was a longtime resident of Houston having lived the majority of her life in Galveston before moving to Houston.

Alexandra spent most of her life caring for others, including family, friends, and anyone in need who crossed her path. When she wasn't caring for her children as they were growing up in Galveston, Alexandra visited the local Galveston hospitals on nearly a daily basis to comfort friends and acquaintances. After those friends left the hospital, she would return to visit the patients she met residing in the adjacent beds. She often served as an interpreter for Greek immigrant patients at the hospital.

Alexandra was also active in the Galveston Greek Orthodox Church and was a member of several church philanthropic organizations, including the Greek Orthodox Ladies Philoptochos Society and the Daughters of Penelope.

Her greatest asset, however, was her enormous heart. All those lucky enough to spend time with her felt joyful and special. That made her unforgettable.

Alexandra was preceded in death by her husband of 54 years, John A. Mehos. She is survived by her children, Stella Mehos Jones, Arthur Mehos and his wife Connie, Mary Mehos Teague and her husband Charlie, and Manuel Mehos; her grandchildren, Mark Jones, Alexis Jones Boswell, Angie Bott, Kim Hollon, Victoria Allison, Constance Coffey, Arthur Mc-

Wilson, Claude

bos, Jr., Collin Teague, Macy Mehos, and John Mehos; and 13 great grandchildren. Friends are cordially invited to a visitation with the family at half-past nine o'clock in the morning on Monday, the 9th of December, at Annunciation Greek Orthodox Cathedral, 3511 Yoakum Boulevard in Houston, where the funeral service is to commence at half-past ten o'clock, led by Cathedral Clergy.

Immediately following, all are invited to greet the family during a Makaria Luncheon in the nearby Martel Hall. The family will then gather for a private entombment at Forest Park East Cemetery in Houston.

In lieu of customary remembrances, and for those desiring, the family requests with gratitude that memorial contributions in Mrs. Mehos' name be directed to Annunciation Greek Orthodox Cathedral, 3511 Yoakum Blvd., Houston, TX, 77007; to Assumption of the Virgin Mary Greek Orthodox Church, 714 19th St., Galveston, TX, 77550; or to the charity of one's choice.

Please visit Mrs. Mehos' online memorial tribute where memories and words of comfort and condolence may be shared electronically with her family.

DAVID EARL BYERS
1936-2019

David Earl Byers, 81, loving husband, Daddy, and Pappy, went home to be with his Lord and Savior, Jesus Christ, on December 3, 2019 in Houston, Texas. He was born July 27, 1938 in Austin, Texas.

David served honorably in the U.S. Army, owned Byers Masonry until retirement 24 years ago, and was a devoted member and trustee of Central Baptist Church. He most enjoyed spending time with his grandchildren, as well as driving his tractor and tending to his cattle at his place in the country.

He is survived by his loving wife of 56 years, Dianne Churchwell Byers; his sons, David Byers Jr., Dane Byers and his wife, Erin, and his daughter Dee Ann McLarney and her husband, Kevin. He leaves behind 8 grandchildren who were the light of his life, Luke, Carly & Lyndi Byers, Georgia & Wilson Byers, and Elle, Lane & Kaitlin McLarney. He is also survived by his brother, Otis Byers; and sisters Juana Burnett and Jo Hayman. David was preceded in death by his son, Darin Ethan Byers, by his parents, Charlie & Hazel Byers, and by

his brothers, Charles & Billy Byers.

Visitation will be held Saturday, December 7, 2019 from 5-8:00 PM and funeral services will be Sunday, December 8, 2019 at 12:00 PM at Memorial Oaks Funeral Home, 13001 Katy Freeway, Houston, TX 77079. His dear friend, Dr. Larry Maddox, will officiate. Pallbearers: Lee Alexander, Ron Carroll, Brad Crommons, Stan Harris, Jon Mitton, Kenneth Myers, Trino Palla, Stewart Simpson. Interment will follow at Pleasant Hill Cemetery in Carlos, Texas.

Keep memories of your loved

crash in prices. Saudi Arabia now aims to prevent an oil glut and avoid a repeat of the oil bust.

Rystad Energy, a Norwegian consultancy, projects non-OPEC nations will add a record-high of about 2.25 million barrels of oil per day in 2020, which is more than double the anticipated demand growth projected for 2020. Rystad said OPEC would need to cut an additional 750,000 barrels a day to help stem the tide, and Saudi Arabia is banking on its extra voluntary reductions doing the trick. That remains to be seen.

For its part, Saudi Arabia also is seeking market stability and stronger oil prices because it is finalizing a

mir Ghadban, confirming Iraq's anticipated compliance moving forward.

Other key OPEC members, such as Kuwait and the United Arab Emirates, would absorb small reductions. And smaller producers such as Oman and Algeria would cut about 10,000 barrels daily.

Meanwhile, OPEC nations Iran and Venezuela, which are exempted from the quotas, are near decades-low production levels because of U.S. sanctions and, in the case of Venezuela, its own geopolitical turmoil and economic free-fall.
