Comments:

U.S.F.S. : Our National Forests, although reserved for natural resources, are part of OUR lands, not just for the benefit of business. So, if business is allowed to profit from the forests, WE THE PEOPLE need to be protected from undue risks from this business profit, like having our aquifers and air contaminated with extraction waste. Environmental regulations MUST NOT BE WEAKENED, in order for business to profit even more from our public lands. If anything, they should be strengthened.
