you should leave these laws alone instead of trying to infringe on my rights as a u.s.citizen you should quit trying to control us you think your doing such a great thing by trying to control our movements. Instead of trying to control and regulate our rights as u.s. citizens given to us by our government ,try learning what hardships you create for our kind by trying to control us,because we create much less environmental problems, as we have to stay informed and consious of what we do to stay within the guidelines you have already set forth for us while you let the fishermen and general public run wild and do as they please ,why not set forth some rules and reg's for them or are you to afraid to have ALL u.s.citizens be angry with you trying to control their rights as well. Instead of trying to make miners miserable and create hatered toward you maybe just try teaching and educating everyone instead of controlling our lives since your not as educated about miniing as your not miners why don't you try mining and abiding by the rules you have already given us ? You might start hating yourselves and have your eyes opened to everything everybody else does to our environment that you haven't made such stringent rules for
