Comments:

I do not approve of revising the two parts of the agency's locatable minerals; 36 CFR part 228 subpart A and 36 CFR part 228. The current Administration on a federal level has been fast tracking many economic policies on our natural resources without environmental studies and public input. As a resident who lives in a pristine area now under consideration for mining I am against any forward movements on "providing jobs". We must remember why fences (rules and regulations) were put up originally before we tear them down.

Sometimes fences are there to protect not keep out. On another note I think the comment period should be extended as the current local paper got this information out ASAP ( I did talk to staff writer) and three weeks comment period is not reasonable for residents to do research or could even miss this deadline if they did not get this dated issue of the local paper which only comes out once a week.
