Please see file which has been attached containing specific comments and recommendations

Grateful Lead Environmental Recovery is a 501(c)(3) organizationWe have recorded (Santa Barbara County) and filed (BLM) a mining claim encompassing shooting ranges located near Santa Barbara California

The principal objective is to remove and reclaim lead deposits that have accumulated on this shooting range complex for approximately the past 50 years thereby helping the Winchester Canyon Gun Club successfully comply with environmental mitigations described in a pending EIS for approval of a use permit from the USFS It is our view that the USFS has been uncooperative and has taken actions contrary to USDA policy and the law

The attached pdf document provides comments in the outline form requested in your notice
