Comments:

I am opposed to this proposed regulation change. The current administration has shown nothing but contempt for regulations designed to protect our environmental, and this proposed change is surely intended to further remove these protections and increase the rate at which overly-powerful commercial interests will exploit our natural resources and degrade our environment and drinking water...all for the profit of a select few and their clients in Congress and the White House. Unfortunately, this administration has also shown quite clearly that he/they have a total disregard for the will of the majority of Americans, so he/they will do whatever he/they want regardless of public comments on this matter. God help us.
